

## **PRODUCTION**

EARTHLOK uses a proprietary formula that incorporates recycled material. Earthlok is Australia's leading manufacturer of flexible concrete matting products, the only product on the market with a Green Star Rating of 3 out of 4 stars.

## **LIFESPAN**

No one like re-works!

Alternative concrete mattress products have a lifespan of around 7-10 years in most applications. Our UV stabilised and chemically inert geogrid has been customised and repeatedly tested to last a minimum of 50+ years in full sun exposure, or 100+ years when used in vegetated applications.

With EARTHLOK, you wont need any other erosion products freighted to site for decades.

Earthlok's carbon footprint is at most, 1/5th of that compared to other concrete mattress products on the market.
