

No one likes re-works!

Alternative concrete mat products have a lifespan of around 7-10 years in most applications. Our UV stabilised and chemically inert geogrid has been customised and repeatedly tested to last a minimum of 50+ years in full sun exposure, or 100+ years when used in vegetated applications.

With EARTHLOK, you wont need any other erosion products freighted to site for decades.

That makes Earthlok 20% of the cost of other concrete mattress products on the market.
